FYI

When using Bigz dies that have score marks, perforations, or lots of details, we recommend that you cut just one piece of paper at a time. Use the Premium Crease Pad with dies that have score marks for best results.

Steel-ruled dies (Bigz and Originals) have sharp edges—handle with care.

When cutting intricate, detailed images, paper (or other material) may become caught in the die. Remove carefully to prevent ripping.

Not all materials will work well with some designs. Experiment a bit with your dies and materials to make sure you get the cutting results you want.

Punches are not meant to cut multiple papers at once; cut only sheet of paper at a time.

When using punches with stamped images, stamp your image first, and then place your punch top down on a table or other flat surface and line up your punched images in the punch. Hold your paper with one hand and press down on the punch with the other.

Before you stamp, look at the bottom of the punch so that you can anticipate how to stamp the images so they'll be easy to punch out. Stamp along the bottom of a piece of card stock so the punch can reach the image.

The images on the coordinating sets for the Blossom Petals and Build a Cupcake Punches aren't clustered together, which means you will need to punch each image out individually.

- Sheen of the ink ranges from subtle to glittery depending on the surface you spray it on and how much spray you use
- Works great with stencils—just place the stencil on your surface and spray
- You can also stamp over it; spray it on a card, let it dry, and stamp your image
- Dries quickly on most surfaces, especially on porous surfaces like card stock
- Safe for scrapbooks
- Acid free, nontoxic

Upsell Opportunity

Color Catcher, Mini Vintage Tags

FYI

Shake well before using.

Spray as much or as little as you want to get the look you want. You'll need to experiment a bit.

For best results, spray 8–10 inches from your project. Spray closer for a heavier saturation.

Like all other mists, Smooch Spritz can overspray (that is, it can land on surfaces other than what you're spraying). You may want to use it outdoors or place the project you're spraying in a contained area, such as a box, so the overspray is controlled.
