## **GETTING STARTED**

- Gather your pictures and organize them in Photo Boxes or a pocket page album.
- If you're including memorabilia ... organize it. If the item is large, consider scanning it and including a picture.
- Decide on an album and start adding your pictures ... journaling can come later when you have a quiet moment.
- Store your Pockets Pages in an extra album and sort them by type. By using this system you can look at your pictures and find the best fit for your next page.

If you're brand new to scrapbooking you will need these things to get started:

1. Binder / Album
  2. Pocket Pages
  3. Project Life Card Collection also known as Core Kit
  4. Accessory Pack
  5. Project Life Journaling Pens
  6. Grid Cards
  7. Project Life Corner Punch
- Journaling: I have chicken scratch for handwriting ....but I also know it's important to include some of my own writing. If you're like me and only want to add bits and pieces of your handwriting you have some options.
    - Use a printer to print on Grid Cards.
    - Use a printer to print on Card Collections.
    - Create a Word Document (or Pages Document on a Mac) and type your story in a text box, print it and add it to a pocket. (Template for each of these will be available on my site the first week of August.)

*Please remember ..... enjoy the journey!!*
